

herbst Insight Office Roaming Module

Making Business Simple

The office roaming solution is a paper free system, any employee away from the office can make orders, get signatures (proof delivery), make quotes, check stock levels and look at the latest customer status details. It is a simple use, paper free solution which keeps all office records live. Each XDA device connects directly to your office and is integrated with the accounts back in head office, so sales representatives are up to date at all times, while administration costs are brought down to the minimum. Transactions are processed as they happen and the office is update instantaneously.

Herbst Software Client & O2 XDA 11 is already out there working for business. This easy to use and pocket friendly remote console can connect securely to your office system to update and retrieve any required information LIVE!! Herbst Software has several different types of clients available for the O2 XDA including delivery, sales, and management modules.

Recording business transactions when and where they happen is the key to getting good accurate source data and being able to retrieve this data when and where required is just as import. The O2 XDA network facilitates remote access to your complete office accounts. This is a very exciting time for business as now all your latest office data can fit in your pocket.

Herbst Software has been developing business solutions for European companies for over 21 years now. Incorporating the latest advancing technology to work simply for people in business is what Herbst does best. Herbst Insight is a comprehensive business solution with series of specialised & integrated modules which allow each module to share the

latest information. This system also gives the company a live Profit & Loss, but more importantly it has a wide range of specialised modules which facilitate employees to focus on their role in the company.

A business case scenario

For a travelling sales representatives;

- Each Sales Representative (REP) has an O2 XDA.
- Sales Orders received from head office can be allocated to each individual REPs' XDA for routing.
- When the REP arrives at the customers' office she/he can add more products to the Sales Order.
- The Delivery Docket can be signed by the customer (on XDA).
- Levels of Stock & Cash in Hand of each REP are known at all times in head office.
- Customers aging balance can be viewed and money can be collected.
- All items delivered are instantly updated at head office and all views can be restricted and managed.
- Customisation XDA modules specifically for your business is an option available to you.
